Professional Summary

Backend Software Engineer with 4+ years of experience building scalable enterprise platforms, banking systems, and payment infrastructure. Specialized in high-performance APIs and distributed backends using Java, Spring Boot, AWS, Docker, and cloud-native practices. Experienced delivering secure, maintainable software for FinTech and multi-subsidiary banking environments, with a focus on reliability, clean architecture, and long-term evolution.

Professional Experience

Backend Engineer — Banking Systems

Synapse Groupe — Client: Bank of Africa Group

Feb 2025 – Present

Ngor, Dakar, Senegal

- Designed and evolved backend services for payments, transfers, and transaction processing supporting enterprise banking platforms across 11+ Bank of Africa subsidiaries.
- Built enterprise APIs for secure integration between banking applications, middleware, and third-party systems; modernized services for maintainability and high-availability resilience.
- Stack:* Java, Spring Boot, Docker, Kubernetes, CI/CD, JasperReports, Microservices, Clean Architecture, Agile Scrum.

Software Engineer — FinTech & Payments

ENG Technologie Group

Jul 2023 – Feb 2025

Dakar-Plateau, Senegal

- Contributed to a FinTech platform for digital lending and payment processing — backend microservices for onboarding and payment workflows.
- Integrated Wave and Orange Money to automate payment processing; applied asynchronous patterns and Spring Security for API hardening.
- Stack:* Java, Spring Boot, AWS, PostgreSQL, Kafka, Docker, GitLab CI/CD, Agile Scrum.

Software Engineer — SaaS Platform

Mafalia — Ecom & Fintech Applications

Jun 2022 – Nov 2023

Dakar Region, Senegal

- Built backend services and REST APIs for inventory, orders, sales, and financial workflows on a SaaS platform for SMEs.
- Improved performance by optimizing queries and business processing (~30% faster responses); introduced caching and async processing.
- Stack:* Java, Spring Boot, MySQL, Angular, TypeScript, REST APIs, Agile XP.

Software Engineer

SarayaTech Senegal

Dec 2021 – May 2022

Senegal

- Developed backend services and full-stack features for patient management, consultations, and prescriptions on a clinical platform.
- Designed secure, scalable REST APIs across business modules; improved performance via caching and async processing.
- Stack:* Java, Spring Boot, Angular, REST APIs, Scrum.

Selected Engineering Projects

Pan-African Payment SDK

Personal / Open Design

- Unified SDK exposing one API to initiate, confirm, and reconcile payments across Orange Money, Wave, and Free Money via provider adapters.
- Adapter pattern with Spring Boot, Redis idempotency keys, and Kafka events for async settlement; signed requests and webhook HMAC validation.
- Technologies:* Java, Spring Boot, Redis, Kafka, REST APIs, JWT, OpenAPI.

Ecom 360 PME — Commerce Management Platform

SaaS Product

- All-in-one commerce platform: POS, real-time inventory, Wave & Orange Money per sale, multi-store management, and accountant-ready exports.

- Angular SPA with Spring Boot multi-tenant REST API, async jobs for reports, store-scoped inventory, and role-based staff access.
- *Technologies:* Java, Spring Boot, Angular, MySQL, Docker, Mobile Money.

Technical Skills

Languages	Java (8–21), TypeScript, JavaScript (ES6+), SQL
Backend	Spring Boot, Spring Security, Spring Data JPA, NestJS, REST APIs, OAuth2, JWT, OpenAPI
Frontend	React, Next.js, Angular, TypeScript, HTML5, CSS3, Tailwind CSS
Cloud & DevOps	AWS, Docker, Kubernetes, Terraform, GitHub Actions, GitLab CI, Jenkins, Maven, Git
Architecture	Microservices, Modular Monolith, Clean / Hexagonal Architecture, DDD, Event-Driven, API-First
Data & Messaging	PostgreSQL, Oracle, MySQL, Redis, MongoDB, Kafka, RabbitMQ
Domains	Banking Systems, FinTech, Payment Processing, Mobile Money, Enterprise Integrations

Education

Master, Software Engineering	May 2024
Université numérique Cheikh Hamidou KANE (UN-CHK)	Dakar, Senegal
Bachelor, Mathematics & Computer Science	Jan 2020 – May 2024
Université numérique Cheikh Hamidou KANE (UN-CHK)	Dakar, Senegal
Computer Programming BootCamp	Jan 2022 – Oct 2022
SarayaTech	Senegal

Certifications

- Java Intermediate — Obtained
- Software Design: From Requirements to Release — Obtained
- Software Engineering Essentials — Obtained
- Digital Banking Fundamentals — Obtained
- AWS Certified Solutions Architect — Associate (In Progress)

Languages

French	Professional working (native)
English	Limited working proficiency

Professional Interests

Software Architecture • Distributed Systems • FinTech • Cloud Computing • Payment Infrastructure • Developer Experience
