PROFESSIONAL SUMMARY

Senior Backend Engineer with 4+ years shipping production Java / Spring Boot systems — secured REST APIs, microservices and Kafka-based event flows for high-volume enterprise and payment platforms. Owns services from design to production (Docker, Kubernetes, CI/CD), with a strong focus on API quality, application security and operational reliability. Based in Dakar (GMT), bilingual French / English.

CORE EXPERTISE

Backend: Java, Spring Boot, Spring Security, Spring Data, REST APIs, Event-driven Architecture, OpenAPI, OAuth2, JWT
Data & Messaging: PostgreSQL, MySQL, Oracle, MongoDB, Kafka, RabbitMQ, Redis
Cloud & Platform: Docker, Kubernetes, AWS, CI/CD, Terraform, Linux, GitLab CI, Jenkins
Reliability: High availability, audit logging, idempotency, retries, production engineering
Architecture: Microservices, Distributed Systems, API Design, System Integration, Legacy Modernization
FinTech / Payments: Payment APIs, Mobile Money, Payment Orchestration, Transaction Processing, Reconciliation

PROFESSIONAL EXPERIENCE

Senior Backend Engineer — Banking Platforms Feb. 2025 – Present
Synapse Groupe — Client: Bank of Africa Group *Dakar, Senegal*

- Owned backend modernization of enterprise banking platforms (Java / Spring Boot, microservices, clean architecture) serving 11+ Bank of Africa Group subsidiaries — standardizing integration patterns and improving maintainability.
- Designed and evolved critical backend services for payments, transfers and transaction processing on high-volume systems.
- Designed secured enterprise REST APIs connecting banking applications, middleware and third-party systems — versioned contracts, audit logging, isolation of core systems.
- Implemented append-only writes and transaction reconciliation so every money movement remains explainable for finance, audit and compliance.
- Industrialized operational resilience and high availability (Docker, Kubernetes, CI/CD) for critical production services.
- Held technical ownership with product, QA and multiple engineering teams — code reviews, software quality, Agile Scrum.
Environment: Java, Spring Boot, Docker, Kubernetes, CI/CD, Microservices, Clean Architecture, Scrum.

Backend Engineer — FinTech & Payments Jul. 2023 – Feb. 2025
ENG Technologie Group *Dakar, Senegal*

- Built backend microservices for digital credit, customer onboarding and payment workflows on a FinTech platform.
- Integrated Wave and Orange Money; designed Kafka event flows and explicit idempotency so retries cannot double-debit.
- Hardened APIs with Spring Security and improved payment operations reliability in production (AWS, Docker, GitLab CI/CD). *Environment:* Java, Spring Boot, AWS, PostgreSQL, Apache Kafka, Docker, GitLab CI/CD, Scrum.

Backend Engineer — SaaS Platform Jun. 2022 – Nov. 2023 (parallel ENG from Jul. 2023)
Mafalia — Ecom & Fintech Applications *Dakar, Senegal*

- Owned backend services and REST APIs for a multi-tenant SaaS — inventory, orders, sales and financial workflows for SMEs.
- Improved performance through query optimization, caching and asynchronous processing, keeping reporting off the collection path.
- Environment:* Java, Spring Boot, MySQL, Angular, TypeScript, REST APIs, Agile XP.

Software Engineer Dec. 2021 – May 2022
SarayaTech *Senegal*

- Delivered backend services and domain features for patient management, consultations and prescriptions on a clinical platform.
- Designed secured REST APIs across business modules; improved performance with caching and asynchronous processing.
- Environment:* Java, Spring Boot, Angular, REST APIs, Scrum.

SELECTED PROJECTS

Pan-African Payment SDK	Payment infrastructure
• Single API to initiate, confirm and reconcile Orange Money, Wave and Free Money payments — 3+ wallets behind one contract. • Spring Boot adapters, Redis idempotency keys, Kafka settlement events, signed requests and HMAC webhook validation. Patterns proven on ENG Technologie FinTech delivery.	
Unified API Gateway	Backend integrations
• Gateway as a boundary: authentication, routing, rate limiting and provider orchestration for multi-entity banking integrations. • Edge JWT, RBAC, request audit logging and versioned REST contracts to protect core systems while opening partner APIs. Patterns from Synapse / Bank of Africa Group delivery.	
Ecom 360 SME	SaaS backend
• All-in-one platform: POS, real-time inventory, Wave & Orange Money tied to each sale, multi-store and accounting exports. • Multi-tenant Spring Boot REST API, async reporting jobs and role-based access — 500+ active merchants in Senegal and West Africa. ecom360pme.com	

TECHNICAL STACK

Languages: Java (8–21), TypeScript, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring Data JPA, Spring Cloud Gateway, REST APIs, OpenAPI / Swagger, OAuth2, JWT, NestJS
Frontend: Angular, React, Next.js, TypeScript, HTML5, CSS3
Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, GitHub Actions, GitLab CI, Jenkins, Maven, Git
Architecture: Microservices, modular monolith, clean / hexagonal architecture, DDD, Event-Driven, API-First
Data & messaging: PostgreSQL, Oracle, MySQL, Redis, MongoDB, Kafka, RabbitMQ

EDUCATION

Master’s, Software Engineering	May 2024 – Present
Université numérique Cheikh Hamidou KANE (UN-CHK)	<i>Dakar, Senegal</i>
Bachelor’s, Mathematics & Computer Science	Jan 2020 – May 2024
Université numérique Cheikh Hamidou KANE (UN-CHK)	<i>Dakar, Senegal</i>
Computer Programming BootCamp	Jan 2022 – Oct 2022
SarayaTech	<i>Senegal</i>
